REAL ESTATE FOR SALE.

F. B. Cate Real Estate Agency

The following is a summary of property we wish to sell. MILL

The size of the main door of the mill is about 30 x 40 feet. Arranged conveniently with bins and sponts so that meal, cracked corn and oats can be spouted in begs. A run of stone to grind the meal, which runs directly in the bin from the sievator. We had an iron mill substituted for two other run of stone, the change costing us \$700, which greatly adds to the speed of grinding, also to the quantity. We have just completed a new flame. Corn is drawn from the track in a wagon holding 5100 pounds and spouted directly to a bin in the cellar holding four loads. From this bin it is carried by an elevator to a bin holding 1400 bushels or to a bin in the flour house holding 800 bushels. Cats are carried to another part of the mill to a bin holding about 1000 bushels. Good water power, electric lighted, and telephone connections. The size of the main floor of the mill is about FLOUR HOUSE.

Size is about 17 x 21 feet, at the right side of storage of corn, equipped with spouts to and from the bin. When not in use for corn this space is very convenient for flour and feed. .t is electric lighted.

STORE HOUSE. Size is about 50x40 feet. Connected with the mill. Used as a stock room for the storage of bagged feed. The door from this room leads through the office. Electric lighted.

SECOND STORE HOUSE. Located beside the track on leased land from the railroad. Helds about ten cars.

Phosphate House—The use of this house is given us free for the handling of the Bradley Fertilizer. Barn-Size about 40x21 feet. Has six stalls, second story for hay, and is electric lighted.

Carriage Shed The size is about 40 x 3 eet. Has a small loft for hay. Manure Shed-There is a manure shed at he left of the barn, where we now have four igs. The size is eleven and a half by twenty-

HOUSE. A ten-room house beside the mill. Electric lighted, A good garden. BUSINESS.

BUSINESS.

We have a good coal business that goes with the mill. We have handled Eradley's fertilizer here for several years and the Bradley's fertilizer furnishes all the money for this business. The flour and feed business can be conducted here with less capital than in other mills. We do not intend to carry any accounts over thirty days and we also have a very large cash trade. Marshfield is located near Montpelier and the mill is connected with E. W. Balley, & Co. by telephons. Feed can be bought of them cheaper than at any other place in the United States. Our clear net gain this year, aside from small expenses, was \$1646.3. We have a very large custom grinding trude and we calculate that this branch alone will keep a man and pay for all the necessary repairs, so that any hing cleamade is clear profit.

The price for all this property and business is
